

KIRAN RAJ R

Cloud Platform & DevOps Engineer — Solutioning & Systems Design

Email kautomate@gmail.com | Phone +31 649986787 | Location Lelystad, Netherlands | Nationality Indian
Portfolio kiranchilledout.github.io/markdown-portfolio | GitHub github.com/kiranchilledout

PROFILE

Cloud platform & DevOps engineer with 13+ years automating and architecting Microsoft Azure infrastructure. I focus on **solutioning and systems design** — turning repetitive, error-prone cloud operations into safe, self-service, reviewable Infrastructure-as-Code platforms, from identity-gated CI/CD to AI infrastructure with end to end Observability. I also focus on developer experience workflows.

EXPERIENCE

Nebius Dec 2024 – Present
Systems Engineer

- Lead solutioning and systems design for internal cloud platforms — multi-stack Terraform landing zones with least-privilege identity isolation and human-reviewed change gates.
- Built self-service platform onboarding: a declarative manifest provisions a fully network-segmented, identity-scoped team environment end-to-end through CI/CD.
- Designed and automated **Entra application CI/CD** — app registrations, app roles and OAuth wiring delivered as code through pipelines.
- Delivered **Access Package CI/CD** — Entra ID Governance access packages managed and shipped as code.
- Architected **AI infrastructure** — an AI landing zone and MCP (Model Context Protocol) servers published behind a shared API-management gateway with enterprise-identity-gated OAuth.
- Built developer **self-service portals** for common cloud/IT workflows.

Tesla Jan 2024 – Dec 2024
Senior Software Engineer

- Built an end-to-end automated validation pipeline for private-cloud data centre builds using PowerShell, Pester and GitHub Actions.
- Automated proactive detection of critical configuration drift — IP mismatches, NVMe provisioning errors and cluster inconsistencies — turning manual discovery into one-click verification.
- Enabled data centre engineers to self-validate builds before handoff, eliminating late-stage rework and accelerating time-to-production.

Capgemini (Tata Steel) Mar 2022 – Jan 2024
Cloud DevOps Engineer — Senior Consultant

- Designed and implemented Azure infrastructure using Infrastructure-as-Code (Bicep, ARM) and zero-touch CI/CD pipelines for streamlined, automated deployments.
- Established secure network access with Private Links, VNet integration and Managed Identities; hands-on with AD and Microsoft Entra.
- Architected infrastructure for cutting-edge workloads — Azure OpenAI, Azure Machine Learning, databases, Kubernetes, Azure Container Registry and App Services.
- Delivered in a Scrum/Agile model contributing to efficient, collaborative delivery cycles.

Amadeus Software Labs 2018 – Feb 2022
Automation Expert — Member of Technical Staff

- Architected and deployed Citrix infrastructure on Azure Cloud with DevOps strategies and Infrastructure-as-Code.
- Designed and deployed automated configuration management across server estates.

Cerner Healthcare 2015 – 2018
Automation — Senior Software Engineer

- Built PowerShell automation and GUI self-service tools for large-scale Citrix migrations.
- Designed and deployed Citrix farms in a data-critical healthcare environment.

IBM (via Artech) 2014 – 2015
System Engineer — Automation

- Operated one of the world's largest Citrix environments — 32+ farms, 6000+ servers — in a data-critical healthcare setting; PowerShell automation, mentored by industry experts.

CORE SKILLS

- Cloud & IaC**
Azure, Terraform, Bicep, ARM, AzAPI
- CI/CD & Platforms**
TeamCity, GitLab CI, Azure DevOps, GitHub Actions
- Identity & Security**
Entra ID (OAuth2 / OIDC, App Roles, Access Packages), Key Vault, Private Endpoints
- Networking**
Hub-and-spoke, Azure Firewall, App Gateway / WAF, Private DNS
- AI & Apps**
Azure Container Apps, API Management, MCP, Azure OpenAI / ML
- Languages**
PowerShell, Python, TypeScript, Bash

CERTIFICATIONS

- HashiCorp Certified — Terraform Associate
- Microsoft Certified — Azure Administrator (AZ-104)
- Microsoft — Azure Fundamentals (AZ-900)
- Microsoft — Azure AI Fundamentals (AI-900)
- Pluralsight — PowerShell Expert
- Citrix Certified Expert

EDUCATION

Bachelor of Engineering
Electronics & Communication — VTU University

INTERESTS

- Web Development
- Home-lab / DIY
- Guitar
